PROFILE

Software Quality Assurance Engineer with hands-on experience in Manual Testing, API Testing, Database Validation, Test Case Design, and Web Application Testing. Experienced in validating REST APIs using Postman, verifying data integrity with SQL Server, designing and executing test scenarios, and managing defects throughout the testing lifecycle. Strong frontend development background with React and Next.js, providing a deeper understanding of application architecture and enabling effective defect investigation and collaboration with development teams.

SKILLS

Manual Testing, Regression Testing, Smoke Testing, Automated Testing, Test Case Design, RESTful API Testing, SQL Server, Postman (API testing and automation), Cypress, Selenium, JavaScript, TypeScript, Next.js, React, Tailwind CSS, Responsive Design, Git

EXPERIENCE

Quality Assurance
06/2026 - Present

Talaland — Tehran, Iran

- Performed comprehensive Manual Testing of core application flows, including Functional, Regression, and Exploratory Testing.
- Designed and executed Test Scenarios and Test Cases, documenting and managing test results in Jira.
- Performed API Testing using Postman, validating request payloads, responses, status codes, and business logic.
- Validated application data and business logic through Database Testing and SQL queries.
- Reported, tracked, and managed Bugs and Tasks in Jira, collaborating with developers throughout the defect lifecycle.
- Developed and maintained Cypress automated tests for selected critical user flows to support regression testing and reduce repetitive manual testing.

Frontend Developer & Quality Assurance
01/2025 - 03/2026

Zarline — Tehran, Iran

- Developed and maintained the frontend of a BNPL platform using Next.js, React Query, and Tailwind CSS while validating new features through functional and API testing.
- Verified REST APIs using Postman and validated backend data using SQL Server to ensure data consistency.
- Executed manual functional, regression, and smoke testing, reproducing defects and verifying fixes before release.
- Refactored the frontend architecture and redesigned core UI components, improving maintainability and performance.
- Built and validated a Progressive Web App (PWA) with Service Workers and push notifications across multiple browsers and devices.
- Built and validated a Progressive Web App (PWA) with Service Workers and push notifications, ensuring functionality across multiple browsers and devices.
- Collaborated with UI/UX designers and backend engineers to validate requirements, investigate issues, and deliver production-ready features.

Quality Assurance
06/2024 - 01/2025

Ozone(Golrang) — Tehran, Iran

- Tested RESTful APIs using Postman and Swagger, and wrote automated test scripts with JavaScript in Postman to validate end-to-end flows.
- Rewrote and restructured technical API documentation into a clear, developer-friendly format using Markdown and Next.js, improving usability for internal teams.
- Collaborated with cross-functional teams using Jira to manage test tasks, track issues, and streamline the QA workflow.

EXPERIENCE

Quality Assurance

01/2020 - 06/2024

Pars Tasmim

Tehran, Iran

- Created and executed detailed manual test cases for web applications, identifying critical defects and improving product quality.
- Documented bugs and tracked them through the full lifecycle, ensuring clear communication between QA and development teams.
- Reviewed and documented API specifications, collaborating with backend teams to validate RESTful APIs and ensure accurate implementation.
- Participated in delivery meetings with clients to gather and clarify requirements, ensuring the final product aligned with business needs.
